

LIST OF CONTENTS

SESSION 1

Properties of Fibres and Fibre Reinforced Concrete

Chairman: Horst FALKNER, Technical University Braunschweig, Germany

Konrad Bergmeister

Experimental and Numerical Optimization of Fire Resistant Shotcrete 3

Lutz Sparowitz

Julia Heidrich, Martin Fellinghauer, Bernhard Freytag

Shear Carrying Behaviour of Ultra High Performance Fibre Reinforced Concrete (UHPFC) 8

Johann Kollegger

Stefan L. Burtcher, Sebastian Z. Ambro, Andreas Kainz

Concrete with High Strength Elements 15

Nedjeljko Akrap

Ante Domazet, Kajo Ferić, Elica Marušić

Steel Fibres in Sprayed Concrete 19

Petr Kabele

Ludek Novák, Mayako Stemberk

Preliminary Numerical Analysis of Shear Fracture in Fiber Reinforced Cementitious Composites 24

Rudolf Hela

Jana Maršálová

Self-Compacting Concrete with Dispersed Reinforcement 28

Gyögy L. Balázs

Imre Kovács

Prestressing in Steel Fibre Reinforced Concrete 32

Drahomir Novák

Zbynek Keršner, David Lehký, Ladislav Řoutil, Miroslav Vořechovský, Josef Knězek, Radomír Pukl

Virtual Stochastic Simulation of Fiber Reinforced Concrete Experiments 35

SESSION 2

Synthetic Fibre Reinforced Concrete for Fire Protection

Chairman: Lutz SPAROWITZ, Graz University of Technology, Austria

Wolfgang Mörrh

Christof Haberland, Johannes Horvath, Anton Mayer

Behaviour of Optimized Tunnel Concrete with Special Aggregates at High Temperature 41

Rainer Waltner

Hannes Kari, Wolfgang Kusterle, Wolfgang Lindlbauer

Analysis of the Load-bearing Capacity of Fibre Reinforced Concrete During Fire 45

Johannes Horvath

Peter Kremnitzer, Ulrich Schneider

Behaviour of Fibre Reinforced Ultra High Performance Concrete at High Temperature 50

<i>Christof Haberland</i> <i>Andreas Rath, Richard Dietze</i> Contract Section „Lainzer Tunnel LT 22“ - First Austrian Practical Experiences by Using PP-Fibre-Concrete for a Watertight Interior Shell of a Tunnel Tube	54
---	----

<i>Takashi Horiguchi</i> Combination of Synthetic and Steel Fibres Reinforcement for Fire Resistance of High Strength Concrete	59
--	----

SESSION 3

Development of Steel Fibre Reinforced Structures

Chairman: György L. BALÁZS, University of Technology and Economics, Hungary

<i>Attila Erdélyi</i> <i>Adorján Borosnyói</i> Durability Studies on SFRC	67
---	----

<i>Horst Falkner</i> <i>Jens Peter Grunert</i> Prestressed Steel Fibre Reinforced SCC without Bar Reinforcement	71
---	----

<i>Martin Billes</i> New Technologies and Applications for Steel Fibre Reinforced Concrete According to the Austrian „ÖVBB Guidline for Fibre Reinforced Concrete“	75
--	----

<i>Jacek Katzer</i> Mechanical Properties of Fine Aggregate SFRC Beams Under Dynamic Load	81
--	----

<i>Jiří Krátký</i> <i>Jan Vodicka, Alena Kohoutková</i> Influence of Different Materials Properties of SFRC on Design of Structural Concrete Members	85
---	----

<i>Igor Hranilović</i> <i>Petra Zgrablić, Darko Meštrović</i> Advantages of Application of the System Based on Carbon Fibers for Static Strengthening of the Structures	89
--	----

<i>Helmut Hartl</i> Design and Full Scale Test of Blast Proof Concrete Containment with Steel Fibres	95
---	----

<i>Ivana Banjad Pečur</i> <i>Velimir Ukrainczyk, Boris Ukrainczyk</i> Concrete Pavements on Bridges	100
---	-----

<i>Enes Seferović</i> <i>Marko Hranilović, Josip Brajdić</i> Croatian Experience in the Use of Fibre Reinforced Concrete	104
--	-----

<i>Gerhard Vitt</i> Crack Control with Combined Reinforcement: from Theory into Practice	110
---	-----

SESSION 4.1

Structural Design for the Future

Chairman: Jan L. VITEK, Czech Technical University in Prague, Czech Republic

Alena Kohoutková

Iva Broukalová

Experience with Experimental and Numerical Research of Fibre Reinforced Concrete Beams 117

Željana Skazlić

Marijan Skazlić, Meho Sasa Kovačević

Use of High Performance Fibre-Reinforced Concrete to Stabilize Underground Openings 121

Zsuzsanna Józsa

Caba Dember, István Für Kovács, Ágoston Seidl

Use of Glass and Synthetic Fibres Preventing Early Age Cracking of Normal and Lightweight Concrete 125

Radomír Pukl

Jan Červenka, Vladimír Červenka, Drahomir Novák, Miroslav Vořechovský, David Lehký

Deterministic and Statistical Models for Nonlinear FE-analysis of FRC-based Structures 130

Jürgen Suda

Konrad Bergmeister

Ultra High Performance Fibre Reinforced Concrete for Bridges 134

Jiří Kolísko

Jan Vodička, Karel Kolář, Tomáš Klečka, Jiří Krátký

Characteristics of Fibre Reinforced Concrete with Structural Synthetic Fibers 140

Rudolf Vierthaler

Post-Tensioning to Flat Slabs with Band Tendons 144

Jure Radić

Zlatko Šavor, Nijaz Mujkanović, Petar Sesar, Ana Mandić, Alex Kindij

Preliminary Design of the Mainland - Pelješac Bridge 149

SESSION 4.2

Structural Design for the Future

Chairman: Jure RADIĆ, University of Zagreb, Croatia

Davorin Kolić

Mohammad Irshad

Feasibility of Pelješac Bridge Variants 159

Jan L. Vítek

Jan Tichý

Self-Compacting Concrete in Bridge Girders 165

Stefan Voss

Josef Hegger

Textile Reinforced Concrete 169

<i>Matthias Lieboldt</i> <i>Harald Schorn, Jan Hausding, Ulf Helbig</i> Textile Reinforced Concrete and Polymer Composite Pipes	173
<i>Ludovít Fillo</i> <i>Andrej Bartók, Luboš Rojko</i> Punching of Prestressed and Fibre Reinforced Concrete Slabs	177
<i>Karl Schlöglmann</i> <i>Matthias Morak, Lutz Sparowitz, Joachim Juhart</i> Integral T-Beam Bridge Partly Made of Ultra-High Performance Fibre Reinforced Concrete	180
<i>Guiseppe Campione</i> <i>P. Colajanni, L. La Mendola</i> Shear Strength of Reinforced Concrete Beams with Fibers and Stirrups	185
<i>Alireza Fadaei</i> <i>Walter Hermann, Wolfgang Lindlbauer</i> High Performance Fibre Reinforced Concrete for Bridge Kerbs - Introduction of a Structural Model	190
<i>Damir Čorko</i> <i>Davorin Lovrenčić, Davorin Kovacic</i> Presentation of the Use of Carbon Fiber Strip in Vault Repair	194
<i>Josef Tritthart</i> <i>Erwin Baumgartner</i> Non-Destructive Methods for Corrosion Protection of Steel in Concrete	198
<i>Petr Štěpánek</i> <i>Jan Fojtl, Vladimír Dibelka, David Horák</i> Reinforcing and Additional Strengthening of Concrete Structures with FRP-materials	202
